I was shocked to hear of the latest problems that Malika's (Tzamariadakis) Cantina, "Sunset Beach", has with the council. These problems continue to plague Malika, though she has made every effort to follow the law and establish the legal grounds for Sunset Beach. The council appears to make it as difficult as possible for Malika, threatening the very existence of the Cantina and any confidence Malika has in her business as an ongoing concern.

During a time when the economic woes of Greece weight heavily on its future with high unemployment and many businesses closing, it seems ridiculous that any government would consider closing a successful Cantina, a Cantina that adds productively to the wealth of the local economy. As well as providing employment for Malika and her husband, Yourgos, Malika provides local employment opportunities and generates business for the local suppliers.

The Cantina is a well known tourist spot that provides a unique opportunity to experience the best Greece has to offer. The Cantina is ecologically designed to fit into the natural environment. The simple structure has been carefully constructed to provide a beautiful spot to sit, relax and enjoy the surrounds. The beach furniture is designed using recycled material where possible and adds pleasantly to the nature experience.

In addition, the carefully prepared menu, drawn fresh every evening by Malika, combines the flavours of Greece, France and North Africa, that is a gourmet feast appreciated by the locals and a restaurant valued by the local community of Chania.

It has taken Malika more than 17 years to establish the unique cultural experience that combines food and service in a tranquil, natural setting. It is evident that

~~Malika's heart is close to the environment and nature in everything she does. The~~

Cantina provides an example of the ideal Greek experience, an example that the local council should cherish rather than seek to destroy.
