«Faros Ceramic» is situated between the villages Paradisi and Theologos on the 19th km Rhodes – Kamiros. The owner Mr. George Katinas learned the ceramic art at an early age, at the famous factories of those times such as “Ikaros” and others. He opened his own business with his wife in 1977. Today our many years experience in the area of ceramics guarantees great quality on our hand made products. Our basic products are plates in many sizes and a wide range of designs and colours decorative tiles for walls and floors big and small hot plates bowls, napkin cases and others. The material we use is Greek potter’ s clay, high quality enamel which are made in high temperatures, for example 1050 degrees celcius, and this makes our products long - lasting and unchangeable. At a period when the traditional hand - made art vanishes we stick to it with love doing our best. In our work shop there is a large exhibition room for wholesale and retail.
