In 1994, Corrocoat Hellas entered into License agreement with Corrocoat Ltd., U.K (world leaders and pioneers in Glass flake filled technology coatings) and is the approved licensee in Greece for the distribution and application of Corrocoat's products and technology.

With over 20 years presence in the Greek market, and over 40 years experience with general ship repairs Corrocoat Hellas has been solving corrosion-related problems in the Greek industry with a long list of satisfied customers in the marine, power, petrochemical and general industry.

Based in Piraeus, Corrocoat Hellas provides solutions to all forms of corrosion, extending the service life of plants and components and eliminating future corrosion problems

Our service is built upon total commitment to quality, together with an inherent flexibility to respond swiftly and positively to the individual needs of our customers.

Coupled with the use of skilled engineering techniques and backed up by solid technical expertise, our advanced corrosion prevention service is based on the application of a range of high technology coatings and composites, to provide long term protection for both new or even severely damaged components.

Through years of relationship building and successful projects Corrocoat Hellas has earned it's place in the market as a company that can be trusted to carry out work right, first time, every time.
