After many years in the commercial diving area, installing offshore cables and pipes, cleaning ship hulls, constructing moorings, salvaging ships etc. we decided to put all our experience in the recreational diving area. But this happened gradually like all good things in life.
Working for so long in a very strict and full of hardship environment made as experts in making our little time off intervals really count.

First came the place. We chose the small island of Agistri , not only because of its proximity to Piraeus Port but also for the wonderful scenery that provides over and under the sea surface. Here we did all our leisure diving and discovered a lovely cove in Dorousa Island where we prepared our barbeques to add a bit of spender in our lives.

Then came the salvaging of Astrolavos . Well now we had the means to invite more friends to join our private paradise, as we like to call Agistri. One thing lead to another and the ideas to create a small diving center and a traditional boat island tour to share with everybody, formed our business.

You can hardly call a diving center with a decompression chamber on board our support ship Captain Babis, a boat like Astrolavos and our diving expertise small but we don't like to brag.

As we did with our friends we would like to invite you all in our love for diving and the good life.

Don't hesitate to contact us if you need us to handle your travel arrangements.
