CET-WELDING PC, has evolved from the field of non destructive testing, specialised in the marine and land based applications, for the inspection of welding seams and has grown into becoming the sole supplier in Europe for the state of the art CET's technology providing carbon steel, alloy steel, cast iron and stainless steel welding technology equipment. Welding with CET products provides State-of-the-art welding technology, optimal usability and superior results. CET-WELDING machines utilises advanced Inverter Control Technology with Insulated Gate Bi-polar Transistors (IGBT), offering high duty cycle equipment to the user - providing a technological advantage in all welding procedures, characterised by superior level of efficiency, conservation of resources and most importantly sustainability, when welding. Regardless of the welding process and/or the required accessories - whether you're looking for MIG/MAG welding machines and respective electrodes or our famous "Auto-Darkening" welding helmet range with high-quality and user-friendly welding technology products, we are here to support and assist with our Customer support and After Sales teams. CET-WELDING strengthens Hengxin Group's market shares with a strong professional technical and sales team as the Group's overseas subsidiary in Europe (CET WELDING) - complimenting their existing global presence with offices in North and South America.—Hengxin Group, founded in 1993 is comprised of her subsidiaries (a) Zhejiang Bouyeon Technology Co., Ltd and (b) Zhejiang Bouhung Technology Co Ltd, the professional manufacturer for Automotive chargers and Automotive Emergency Power Supply, with their factory located in Taizhou city, China - with a facility of 10,000 square meters, staffed by 200 members.
