At Canco, we don't settle for the average. Instead, we always challenge ourselves to push our boundaries, maximize our potential and aim for the "awesome effect" in everything we undertake.

Operating in the field of freight forwarding and logistics since 1988, we know that the market needs shift constantly, and ensuring customer satisfaction is always a demanding task. We live up to this challenge by empowering our people, investing in technology and by having a strong and dynamic network of partners all over Europe, which ensures that every shipment will reach its destination in the most efficient way.
