Labea Yachting was found in 2000 as a family company providing yachting consultation, as well as management and maintenance services, while at the same time making investments for future sales and charters in the luxury yacht industry. Our love for the sea gave rise to our interest in yachting, which later became our main drive and desire.

Today we continue to pour all our passion and experience into our profession which makes us more than proud to be doing what we do.

We are one of the most preferred companies in the services and shipping industry

in the Greek and International markets and we co-operate with the biggest yachting companies in Turkey and Italy, as well as with some of the most renowned names in the yachting industry world.
